

Alva+

Named after Thomas Alva Edison, American inventor and pioneer of DC electrical power.

An evolution of our ever-popular Alva (formerly known as Velociti), the Alva+ features both pedal assist and throttle power on demand. The model offers ease and style – and the unique flexibility to enjoy a range of journeys in your preferred way.

Evolution

The Alva+ was specifically designed to meet the growing need for both pedal assist and throttle power on demand. Offering superior features and a choice of power, the Alva+ gives you greater flexibility and options when planning your journeys.

Convenience

The Alva+ allows you to enjoy your journey with ease and style, offering a maximum power assistance speed of 38km/h (24mph) and a range of 70 km (40 miles)*. The model's impressive 500W motor and choice of larger, 17ah battery deliver all the range, power and flexibility you need, while features such as hydraulic brakes, magnetic plug to the battery and security e-fob ensure it delivers on performance and convenience.

* Dependant on power setting, rider and riding conditions.
